

CITY SHEET METAL CO. LTD.

Rainware | Soffit & Fascia | Flashings & Trims

Complete Exterior Solutions

From rainware and soffit to fascia, trims, and roof edge accessories, CSM provides a full system of exterior products designed to work together for a strong, seamless finish. Each component is engineered for durability, easy installation, and lasting performance in any climate. With coordinated colours and profiles across the line, CSM makes it simple to protect and enhance curb appeal – all from one trusted source.

100 YEARS

City Sheet Metal (CSM) has over 100 years of proven reliability as a Canadian manufacturer of exterior metal products. Trusted by contractors, builders, and homeowners across Western Canada, we've built our reputation on quality, dependable service, and lasting performance. With every product engineered to stand the test of time, CSM continues to deliver solutions that protect and enhance homes and projects alike.

Maintenance-free

Durable finishes resist peeling, flaking, and fading, so your soffit, fascia, and rainware stay looking new without the need for repainting or frequent upkeep.

Industry leading service and speed

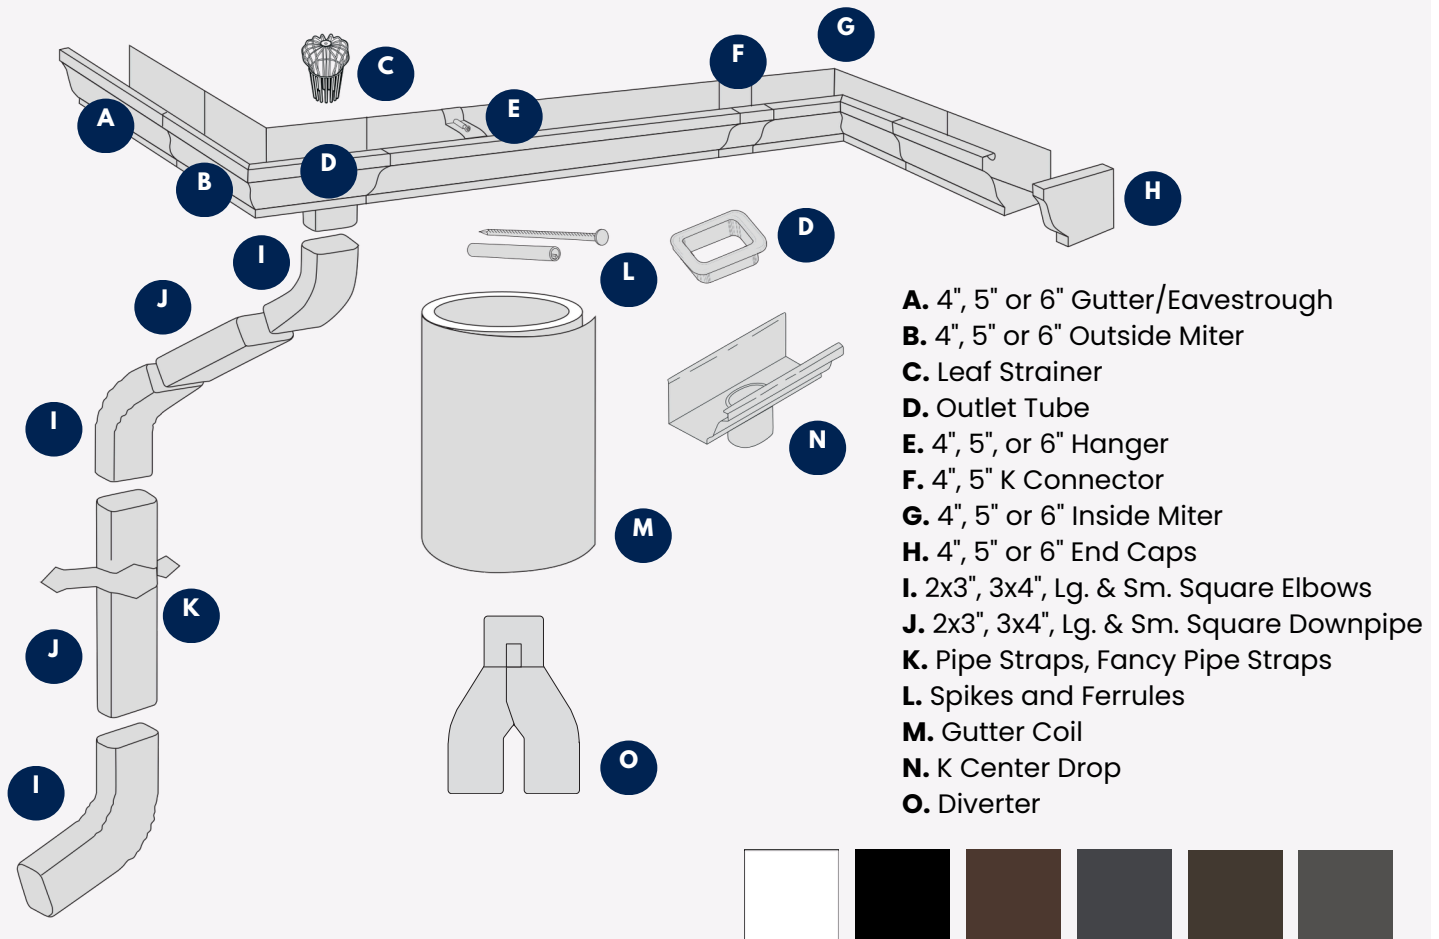

With decades of experience and a reputation for reliability, CSM provides contractors with fast, dependable supply and responsive support to keep projects on schedule.

COMPLETE RAINWARE SOLUTIONS

CSM provides everything you need to build a reliable, great-looking gutter system, from gutter coil and rollformed eavestrough to mitres, downpipes, hangers, and connectors. With our full line of rainware components, you can create a system that's as durable as it is seamless.

- Durable finishes that resist peeling, flaking, cracking, or chipping
- Coordinated colours to match fascia, soffit, and roofing accessories
- Designed for easy installation and long-lasting performance

SOFFIT, FASCIA & ROOF EDGE

Engineered for airflow, style & structural protection.

CSM's high-performance soffit system promotes continuous airflow where it's needed most, keeping attics drier, reducing moisture build-up, and extending the life of your roof.

Durable finishes and precision engineering add lasting style and protection to your home's exterior, ensuring beauty and performance for years to come.

Together with matching fascia and roof edge components, the system delivers a clean, seamless finish that safeguards your home from every angle.

BENEFITS

SOLID FRAMEWORK

Adequate ventilation helps protect the wood framing of your home, ensuring it lasts longer and stays structurally sound.

FRESH INDOOR AIR

Maintaining healthy air quality indoors helps safeguard the wellness of everyone living in the home.

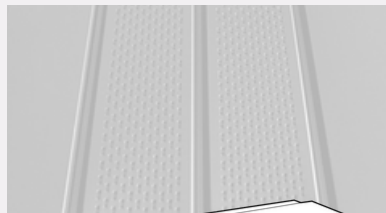

ENERGY EFFICIENCY

Good airflow management means your home stays comfortable – while keeping energy bills in check year-round.

FLASHINGS & TRIMS

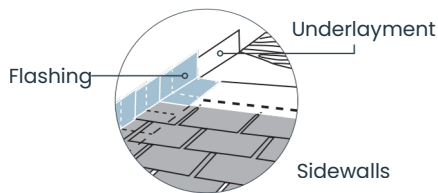

Moisture defense for every joint, edge, and corner.

Essential for every roofline, flashing is a small component with a big job—protecting your building from costly water damage where walls and roofs connect. CSM's flashing solutions are engineered for long-lasting performance, easy installation, and reliable moisture control.

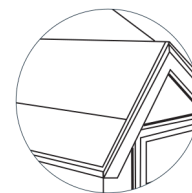

1. Roof-to-Wall Joint

Where the roof meets the wall is one of the most common points for water intrusion.

2. Protective Barrier

Flashing forms a critical seal between siding or masonry and the roof deck to direct water safely away.

3. Moisture Defense

Helps prevent water from seeping behind the wall surface—reducing the risk of mold, rot, and structural damage.
